

# Call for Abstracts

**ELETROTEC**  
**EMPOWER**  
SOUTH AMERICA

**AUG**  
**25–27**  
**2026**

EXPO CENTER NORTE, SÃO PAULO, BRAZIL

**The event for  
electrical infrastructure  
and energy management**

Please submit an abstract of 500 words or less outlining your presentation on any of the topics listed further below. The objectives of your paper, the description of the problem, and your solutions and conclusions must be clearly and concisely indicated. The abstract may contain images, but must not exceed two pages.

The abstract must make clear the importance of the presentation in providing insights or valuable information to conference delegates and also its **contribution to developing technology and the relevant market**.

As a general guideline, please consider that conference delegates will be interested in solving practical problems of electrical engineering, in lessons learnt from real cases, in aids for decision-making and business, as well as in learning about technological trends and marketing strategies.

## INDUSTRIES AND THEMES SUBMIT YOUR ABSTRACT

- Low voltage installations; Products and techniques
- Medium voltage installations
- Substations, primary cabinets
- Wind energy installations
- Solar photovoltaic energy installations
- Energy storage
- Electric vehicle charging systems
- Lightning and overvoltage protection systems
- Grounding, electromagnetic compatibility, coexistence of power and wireless systems
- Energy quality, conditioning and availability; Harmonics
- Distributed generation, cogeneration, generator sets, parallelism
- Lighting technology and installations
- Reactive power compensation
- Electricity prices, costs and legislation
- Energy management and conservation
- Electric motors, their controls and starters
- Electricity in potentially explosive atmospheres
- Safe and reliable power installations at critical facilities: data centers, call centers, hospitals
- Small hydro plants
- Protection devices and systems
- Automation and monitoring of electrical systems
- Project commissioning and testing; measuring instruments
- Installation certification
- Product compliance and certification
- Maintenance and predictive technologies
- Project design and realization
- Facility management

### TIMELINE

by March 16, 2026	Submit abstract
by April 6, 2026	Conference committee reviews abstracts
by April 13, 2026	List of selected abstracts is announced
by April 27, 2026	Submit final version of abstract
by May 25, 2026	Submit complete papers for publication in the annals
by June 8, 2026	Papers are reviewed and adjustments suggested
by June 29, 2026	Conference program is announced and Book of Abstracts is published

Send your abstract to: [congressoelerotec@arandaeventos.com.br](mailto:congressoelerotec@arandaeventos.com.br)
